Capital employed	797.3	842.4	877.5	876.9	876.9	835.2
Capital employed RL12 average					865.0	875.3

* Presented 2018 figures with IFRS 16 impact are based on illustrative non-IFRS calculations from reported financial notes to form a comparison basis for IFRS 16 figures in 2019. These calculations have been implemented from the opening balance of 2017. Figures are non-IFRS additional financial information and are not be considered as reported IFRS figures.

The impact for applying IFRS 16 lessee accounting is significant for the Group's figures, especially on balance sheet where right-of-use assets and lease liabilities were recognised since opening balance sheet. Together with material changes between lines of income statement and impact on net profit in a single period, the impact to the Group's KPIs such as ROCE and net debt / EBITDA was significant.

1) excluding items affecting comparability, more information on IACs presented in upcoming table

2) Cramo changed the calculation method of ROCE's capital employed component into 12 months average in Q4/2018. The change has been applied into comparison figures. 12 months average reflects better the long-term development of capital employed compared to previous 2-point average calculation.
